

Amendments to Specification

Please delete paragraph 32 in the application as filed. In place of the deleted paragraph, please add the following replacement paragraph:

[Para 32] When in trailer form , the transfilling station is also configured with a heavy-duty hitching mechanism (also known as a “fifth wheel” hitch [111] 120 required because of the weight of the transfilling station. Reinforced floors [112] 121 can also be implemented to support the increased weight of the transfilling apparatus and canisters 101.

Please delete paragraph 42 in the application as filed. In place of the deleted paragraph, please add the following replacement paragraph on a separate page of the application:

[Para 42] A mobile transfilling system for filling gas canisters on-site is presented. The transfilling system includes revised components specifically sized and positioned within the system to provide for ease in transport and maintenance, as well as stability. The invention further presents a quick and cost-efficient method for implementing the system.
